7.53 / 10 GPA	59.4 %	74.8 %

SKILLS

HTML   CSS   JavaScript   Tailwind CSS   React Js   Redux RTK   React Router   Git

EXPERIENCE

My experience with front-end projects from different platforms has taught me valuable lessons about development and collaboration.

Frontend Mentor | The Odin Project | Chingu | Frontend Practice

Project: MadLib Stories (March 23 - April 23)   **Certificate   Live**

Summary : As part of Chingu's Tier-1 project, MadLib Stories, our team was tasked with creating a dynamic storytelling platform within a 6-week timeframe. I contributed by developing two unique story pages using HTML, CSS, and JavaScript. Implementing form input validations was crucial to ensure a seamless user experience, allowing users to enjoy personalized narratives based on their inputs.

Project: DishDive (October 23 - November 23)   **Certificate   Live**

Summary : As a member of Chingu's Tier-2 project, DishDive, our team developed an innovative web application aimed at simplifying recipe discovery based on available ingredients. Whether users needed to prepare a quick meal with what was on hand or sought culinary inspiration, DishDive provided the solution. I leveraged React and Tailwind CSS to build the application, managing a team through challenging deadlines. This experience was invaluable in honing my teamwork and project management skills.
