SUMMARY

Frontend Developer with nearly 2 years of experience building production ERP platforms for web (React.js, Next.js) and mobile (React Native), including apps published on Android and iOS. Skilled at turning business requirements into scalable, reusable UI, integrating REST APIs, and shipping stable releases. Experienced in mentoring interns, conducting code reviews, and working directly with clients, backend, QA, and product teams.

SKILLS

Languages : HTML, CSS, JavaScript, TypeScript

Technologies : React.js, React Native, Next.js, Redux, Context API, React Router, React Query, Tailwind CSS, Material UI, Axios, REST APIs, Node.js, Express

Database & ODM : MongoDB, Mongoose

Tools & Cloud Platforms : Git, Netlify, Vercel, Android & iOS app publishing

WORK EXPERIENCE

Frontend Developer at Spontaneous Enterprise Pvt. Ltd.

Ahmedabad, India

React.js / React Native Developer

Nov 2024 – Present

ERP Platform (Web / Mobile)

- Built and maintained ERP modules using React.js and Next.js, contributing to a scalable and maintainable front-end architecture.
- Built a React Native mobile app for the ERP platform, giving users mobile access to core business workflows.
- Published the app on both Android and iOS, owning the deployment process, release cycles, and ongoing maintenance for stable updates.
- Designed a custom, interactive UI/UX from scratch that balances usability and performance while staying consistent with the ERP's design standards.
- Improved UX across Dashboard, List, and Form pages with cleaner layouts, smarter filters, and clearer validation, reducing average task completion time by 30%.
- Built reusable components with Material UI, Tailwind CSS, and React Hooks, cutting duplicated UI code by 40% and speeding up new page development by 25%.
- Partnered with backend, QA, and product teams to deliver new features with smooth API integration and consistent data flow.
- Mentored interns on React fundamentals and led code reviews to raise overall code quality.
- Hosted internal knowledge-sharing sessions on React.js to promote best practices across the team.

Additional Delivered Projects (Web)

Courier Service Platform & Internal Developer FAQ Platform

- Built and managed a production courier service web app with Next.js and Material UI, delivering a responsive, scalable platform for business operations.
- Gathered requirements through client meetings and on-site visits, aligning technical solutions with business needs.
- Owned the full development lifecycle, from design and development to deployment and maintenance.
- Created an internal developer FAQ platform that centralizes common technical issues and solutions, improving team productivity.

EDUCATION

Parul University

Vadodara, India

Bachelor of Technology in Computer Science and Engineering (GPA: 7.53/10)

Jul 2018 – May 2022

PROJECTS

Invoicely: manage and track your invoices effectively [[Live](#)]

Aug 2024 – Sep 2024

- Built a full-stack invoice management app with the MERN stack, letting users create, update, and track invoices efficiently.
- Designed RESTful APIs for invoice management and user authentication.
- Implemented secure authentication and a personalized dashboard to protect user data and simplify invoice tracking.

WatchWise: Your Ultimate Movie Search Companion [[Live](#)]

Mar 2024 – Apr 2024

- Built a movie discovery app featuring personalized watchlists and curated content to drive user engagement.
- Implemented search filters by title and release year, so users can find movies quickly.
- Developed a responsive, scalable frontend with React.js, using React Query for data fetching and caching, Context API for global state, and Tailwind CSS for styling.
