WORK EXPERIENCE

Frontend Developer at Spontaneous Enterprise Pvt. Ltd.

Ahmedabad, India

React Js / React Native Developer

Nov 2024 – Present

ERP Platform (Web / Mobile)

- Developed and maintained ERP system modules using React.js, Next.js contributing to scalable and maintainable front-end architecture.
- Built a React Native mobile application for the ERP platform, enabling mobile access to core business workflows.
- Successfully published the React Native mobile application on both Android and iOS platforms, managing the deployment process and ongoing maintenance to ensure stable releases and continuous improvements
- Designed and developed a custom, interactive UI/UX from scratch, focusing on usability and performance while maintaining consistency with the ERP system's overall design standards.
- Collaborated with backend, QA, and product teams to deliver new features, ensuring smooth API integration and consistent data flow.
- Conducted code reviews and mentored interns, helping them learn React fundamentals and improve code quality.
- Organized internal knowledge-sharing sessions on React.js, supporting team learning and best practices adoption.
- Implemented reusable UI components and optimized front-end performance, improving maintainability across the application.

Additional Delivered Projects (Web)

Courier Service Platform & Internal Developer FAQ Platform

- Developed and managed a production courier service web application using Next.js, Material UI, delivering a responsive and scalable platform for business operations.
- Participated in client meetings and on-site visits, gathering requirements and aligning technical solutions with business needs.
- Managed the full development lifecycle, from design and development to deployment and maintenance.
- Developed an internal developer FAQ platform to centralize common technical issues and solutions, improving productivity and efficiency.

EDUCATION

Parul University

Vadodara, India

Bachelor of Technology in Computer Science and Engineering (GPA: 7.53/10)

Jul 2018 – May 2022

PROJECTS

Invoicely: manage and track your invoices effectively [[Live](#)]

Aug 2024 - Sep 2024

- Developed an Invoice Management App using the MERN stack, allowing users to create, update, and track invoices efficiently.
- Gained hands-on experience with MongoDB, Express, React, and Node.js, while designing RESTful APIs to handle invoice management and user authentication.
- Integrated secure user authentication, enhancing data protection and providing a personalized dashboard for invoice management.

WatchWise - Your Ultimate Movie Search Companion [[Live](#)]

Mar 2024 - Apr 2024

- Developed a user-friendly movie discovery application that features personalized watchlists and curated content, enhancing overall user engagement.
- Implemented advanced search filters, allowing users to quickly find movies by title and release year, resulting in a more streamlined viewing experience.
- Built a responsive and scalable frontend using React.js, integrating React Query for data fetching and caching, Context API for global state management, and Tailwind CSS for modern UI styling.

COLLABORATIVE PROJECTS

DishDive: Recipe Discovery Web Application [[Live](#)]

Oct 2023 - Nov 2023

- Served as a key contributor to Chingu's DishDive project, developing a web application that streamlines recipe discovery based on available ingredients.
- Utilized React and Tailwind CSS to create a responsive, user-friendly interface, enhancing the overall user experience.
- Collaborated effectively with the team under tight deadlines, improving my project management and teamwork skills while delivering high-quality results in a dynamic environment.

MadLib: Interactive Story Game [[Live](#)]

Mar 2023 - Apr 2023

- Contributed to the development of an interactive game that generates humorous stories based on user-selected words, such as nouns, verbs, and adjectives.
- Utilized HTML, CSS, and JavaScript to create an engaging, fun-filled experience for users.
- Collaborated with the team to ensure seamless integration of images and content selection, enhancing the overall user interaction.
